

Give your sales a Mighty Push™

Take your business to the next level of smart mobility with a custom mobile app. We mean your own branded app, for your business, not a directory full of your competitors trying to take your customers.

Increase revenue and customer loyalty with **Mighty Push**, a beacon-enabled mobile marketing app for iPhone & Android.

Send Push Notifications

Push notifications average an open rate of 90% and view time of 19 minutes, compared to Email's 23% open rate and 6.4 hour view time. Reach your customers wherever they are, in real-time with discounts, special events or deals.

Proximity Marketing

Place our smart beacon (tiny Bluetooth device) at your business location to instantly greet and notify customers about the deals/offers on their app, as soon as they walk in.

Centralize Information

All the information your customers want, found in their pocket: hours and locations, maps, products and services.

Share Deals

Share specials, deals and coupon codes with customers that they can redeem the next time they visit your store.

Get your custom app on the app store immediately with **Mighty Push**. We provide you with your own easy-to-use private web site to keep your App's content up-to-date!

It's affordable, intuitive and will turn your casual customers into loyal customers!
Call us at **+91.481.2575840** for more details!
